

ROMANIAN REPORTS IN PHYSICS

Volume 54, Numbers 6 – 10, 2002

This volume is dedicated to **Professor Geavit Musa** on his 70th anniversary

PART II

Contents

PLASMA DIAGNOSTICS

| | |
|--|-----|
| I.A. RUSU, G. POPA, J.L. SULLIVAN, Ar-O₂ rf plasma diagnosis by mass spectrometry | 295 |
| I. MIHĂILĂ, V. ANITA, C. COSTIN, L. SIRGHI, G. POPA, I. TURCU, Electron distribution function in magnetron discharge | 301 |
| STELUȚA TEODORU, C. AGHIORGHIESEI, G. POPA, Probe methods used in diagnosis of plasma with two groups of negative charged particles | 309 |
| G. SANDOLACHE, C. FLEURIER, J.-M. BAUCHIRE, V. ZOIȚA, Determination of the plasma parameters in a capillary discharge | 317 |
| G. SANDOLACHE, J.-M. BAUCHIRE, E. LE MENN, F. GENTILS, C. FLEURIER, V. ZOIȚA, Experimental determination of the Stark broadening of CuI spectral lines in a plasma of a capillary discharge | 323 |
| M. MICLEA, K. KUNZE, J. FRANZKE, C. VADLA, K. NIEMAX, Spatial and temporal distribution of excited Cl atoms in a linear dielectric barrier discharge | 329 |

RADIATION AND PARTICLES

| | |
|---|-----|
| I. IOVA, FLORIANA IOVA, I. IONOȚĂ M. BĂZĂVAN, GH. ILIE, G. STĂNESCU, CN molecule vibrational spectra excitation in several LTE plasma sources conditions | 335 |
| LUMINIȚA CIOBOTARU, PETRICĂ CHIRU, CĂTĂLIN NEACȘU, GEAVIT MUSA, PDP type barrier discharge as an efficient excimer ultraviolet radiation source | 343 |

TOKAMAK PLASMAS

| | |
|--|-----|
| C.V. ATANASIU, S. GÜNTER, K. LACKNER, A. MORARU, A.A. SUBBOTIN, I.G. MIRON, The influence of the plasma geometry on the tearing mode stability parameter Δ' for the ASDEX-upgrade tokamak | 353 |
| C.V. ATANASIU, I.G. MIRON, Vacuum field calculation in a perturbed toroidal plasma with divertor | 359 |

DENSE MAGNETIZED PLASMAS

| | |
|--|-----|
| M.S. RAFIQUE, A. PATRAN, A. ȘERBAN, V. ZOIȚA, Investigation of the relationship between neutron and X-ray emissions from a plasma focus | 365 |
|--|-----|

| | |
|--|-----|
| A. PATRAN, A. ȘERBAN, M.S. RAFIQUE, Time-resolved features of the electron beam emission from a neon plasma focus | 371 |
| M.S. RAFIQUE, S.V. SPRINGHAM, A. PATRAN, V. ZOIȚA, On the relationship between neutron yield and deuteron spectra in a small plasma focus device | 377 |
| M.S. RAFIQUE, P. LEE, S. LEE, A. PATRAN, Energy analysis of the deuteron beams generated in a small plasma focus device | 381 |
| V. ZOIȚA, S. LUNGU, On the feasibility of a fusion-fission hybrid reactor driven by dense magnetised plasmas | 387 |
| CAI LI, SHI YUJUAN, A. PATRAN, R.S. RAWAT, Estimation of current sheath curvature in plasma focus device using magnetic probes | 395 |
| V. ZOIȚA, J. LAROUX, R. PRESURĂ, A. PATRAN, M. CENGHER, Time correlations of the X-ray emission and electromagnetic parameters of the plasma focus device | 403 |
| M. GHEORGHIU, I.A. RUSU, C. AGHIORGHIESEI, G. POPA, On the propagation of a low energy oxygen ion beam | 411 |
| I. TOPALA, N. APETROAEI, N. DUMITRAȘCU, G. POPA, Interfacial aspects regarding PA-6 films in biological liquids | 419 |
| D. LUCA, M.W.G. PONJÉE, W.P.A. JANSEN, V. ANITA, G. POPA, H.H. BRONGERSMA, Oxidation of TiN surface under a low-pressure O₂ atmosphere | 427 |
| M. BRAIC, V. BRAIC, A. MANEA, M. BĂLĂCEANU, G. PAVELESCU, Effect of ion bombardment on the properties of TiN coatings deposited by the cathodic arc technique | 433 |
| M. MĂGUREANU, M. HEINTZE, M. KETTLITZ, Methane conversion in a pulsed microwave plasma | 439 |
| D. IGHIGEANU, D. MARTIN, R. MACARIE, E. ZISSULESCU, E. MATEESCU, G. CRĂCIUN, Air pollution control by DC, pulse and microwave induced non-thermal plasmas . | 447 |
| D. MARTIN, D. IGHIGEANU, R. MACARIE, E. ZISSULESCU, E. MATEESCU, G. CRĂCIUN, SO₂ and NO_x removal by electron beam and microwave induced non-thermal plasmas | 453 |
| C.P. LUNGU, H. SAZE, O. TAKAI, Nanoindentation measurements of superhard TiN films prepared by magnetron reactive sputtering plasma using neon and nitrogen | 465 |
| O. FUKUMASA, K. OSAKI, S. FUJIMOTO, C.P. LUNGU, ANA MIHAELA LUNGU, Ag/graphite tribological coatings prepared by plasma electrode type spray gun | 471 |
| G. MUSA, V. CIUPINĂ, C.P. LUNGU, I. MUSTAȚĂ, H. EHRICH, T. HEGEMANN, TVA discharges for hydrogen free carbon layer deposition | 481 |
| I. MUSTAȚĂ, G. MUSA, BIANCA CUDALBU, C. CUDALBU, GMR layers as deposited by TVA technology | 487 |
| E. GRIGORE, C. RUSSET, Titanium nitride films deposited by a combined magnetron sputtering the and ion implantation method | 493 |
